UHI | Futures
Dreuchdan Teachdail

At UHI Futures, we provide fair, impartial, and professional careers education, information, advice, and guidance delivered by appropriately qualified practitioners. Through access to resources, opportunities, and expert support, we help students and graduates make informed decisions that reflect their individual goals, values, and circumstances. Most importantly, we are here to support students and graduates in exploring, discovering, and shaping their own futures. Our role is not to define what those futures should be, but to empower individuals to make choices that are right for them.

As members of the Graduate Futures Institute (GFI) and holders of the GFI Membership Quality Standard, UHI Futures operates in accordance with a professional code of ethics that requires impartiality and compliance with relevant legislation in the delivery of career development services.

We recognise and value the diversity of our student community. Our students and graduates come from a wide range of backgrounds and experiences, each bringing their own perspectives, beliefs, and aspirations.

We believe that informed decision-making is best supported by access to a broad range of opportunities. As part of our commitment to UHI student and graduate success, we facilitate connections with employer partners and professional networks that offer opportunities which meet UK employment legislation and equality requirements, or equivalent quality assurance standards where opportunities are based outside the UK.

We respect every student's right to hold and express their own views on issues that matter to them. We also recognise that individuals have different values, interests, and priorities. As a result, not every opportunity, event, or experience we promote will be suitable for everyone. Our commitment is to provide access to a diverse range of opportunities, enabling UHI students and graduates to make informed choices about the paths they wish to pursue.
